

WEB CONFERENCING SOLUTIONS AT WORK

THE ULTIMATE CLOUD COMMUNICATIONS PLATFORM

Inforenet Web Conferencing is our comprehensive turnkey web conferencing service

- ▶ Web Presentations
- ▶ Audio Conferencing
- ▶ Multi-Presenter Seminars
- ▶ Multi-User Video
- ▶ Remote Desktop Supporting
- ▶ White Boarding
- ▶ Desktop Sharing
- ▶ Branded Landing Pages

INTERACTIVE REAL-TIME CONFERENCING

Inforenet Web Conferencing is our comprehensive turnkey webinar service that supports web presentation, live multi-user video and audio conferencing, and remote desktop support capabilities. Inforenet Web Conferencing can be ordered in conjunction with any other Inforenet family of services. It is more extensible and user friendly than webinar solutions from providers like GoToMeeting®, Adobe®, and Webex®.

Web conferencing is also ideal for your IT team, allowing:

- ▶ Remote support access
- ▶ Faster problem resolution
- ▶ Access to and from any Windows or iOS device

WEB CONFERENCING

Delivering online presentations, conducting audio and video conferencing — or simply using desktop screen share for IT support — is simplified with the Inforenet Web Conferencing platform. Instantly conduct meetings and add participants on the fly, all on your branded landing page without any messy plugins or downloads.

QUICK BY THE CLICK

With Inforenet Web Conferencing solutions you can schedule meetings via the calendar in just seconds and click the tools you need to communicate effectively. Private IM chat to select participants, use the annotation pen to focus attention on the subject and send files instantly to participants with just a click!

EASY SETUP

We have integrated the audio conferencing infrastructure of our voice control platform into our web and video platform to provide users multiple access points across PSTN, mobile and VoIP carrier networks. Dial in from home phones, smartphones, computers, iPads ... virtually any device on any OS.
